# DaShaun Carter

Deliberately practicing to build, run, and manage, better software, faster.

Grain Valley, Missouri, United States

## Summary

Deliberately practicing to build, run, and manage, better software, faster. Generalist. Computer Science. MBA. Continuously learning.

---

## Experience

### Broadcom

Research Development Software Engineer, Spring Developer Advocate  
November 2023 - Present (6 months)

### VMware Tanzu

Staff Technologist, Spring Developer Advocate  
December 2021 - November 2023 (2 years)  
United States

### Redis

Partner Solution Architect  
October 2020 - December 2021 (1 year 3 months)

### VMware

Sr. Platform Architect  
December 2019 - October 2020 (11 months)

### Pivotal Software, Inc.

Sr. Platform Architect  
June 2018 - December 2019 (1 year 7 months)  
Kansas City, Missouri Area

### medZERO, Inc.

VP of Engineering / Lead Architect  
November 2017 - June 2018 (8 months)  
Kansas City, Missouri Area

MedZERO, Inc. was formed to address the rising cost of healthcare and financial risk placed upon employees. Very simply, medZERO is changing the way you pay for healthcare!

This voluntary benefit program offers your employees instant access to funds for out-of-pocket medical expenses. Our ZERO interest installment plans make paying for medical expenses budget friendly for your employees. Payments are deducted using your payroll systems, so employees never have to deal with scheduling or tracking payments. Most importantly, there is ZERO cost for the employer and employees to participate in medZERO!

Visit our website at [www.medzero.com](http://www.medzero.com) to learn how you can change the way your employees pay for healthcare today.

Mobile Capital Group Inc.

VP of Engineering

October 2015 - June 2018 (2 years 9 months)

Kansas City, Missouri Area

Mobile Capital Group Inc. offers a new Employee Benefits program and financial wellness solution that promotes making better financial decisions. MCG issues, processes, and funds in seconds, an IOUBenefits® account and virtual eCard via our customized mobile Apps and bankcard gateway, processing platforms.

#FinTech

Garmin International

Technical Lead Engineer

April 2010 - October 2015 (5 years 7 months)

Olathe KS

I focused on removing bottlenecks and roadblocks from our development and deployment processes. I designed and implemented many of the patterns and principles of the development process. I did a lot of cool stuff on a website that connected millions of devices to millions of people, daily. I was the lead responsible for sending gigabytes of data, from those millions of devices, to hundreds of partners, daily. Most recently: automated the deployment of 1300+ nodes across 10 different environments, implemented alternative

open source solutions, with zero licensing fees, for multiple tools used during development and production monitoring, provided full coverage to the rapidly growing environment while the non-trivial licensing agreements could be renewed, increased the frequency of deployments, improved the velocity and quality of deployments, created a repeatable deployment process that saved the company hundreds of man-hours monthly. I learned more in these 5+ years than the previous 15. I was able to contribute to a product that I use everyday. I worked in a dream job, for an amazing company, with teammates in at least 5 different countries, on the best team I have ever been a part of.

#### Nicholson Kovac

1 year 1 month

##### Technical Architect

October 2009 - April 2010 (7 months)

Dictate design choices for software developers, platforms, coding and technical levels. Gain complete understanding of clients' needs and effectively communicate them to the software design and development team. Oversee the development team and manage the full life cycle of the software development process, monitoring research, reviewing code and supervising any testing. Ensure that all development practices are in compliance with the company's best practices policies and procedures. Track and maintain records and metrics and report to the Director of Digital Services.

##### Consultant

April 2009 - October 2009 (7 months)

#### Risk Analytics, LLC

##### Software Engineer

May 2007 - April 2009 (2 years)

#### Saepio Technologies Inc.

##### Senior Software Engineer

June 2004 - April 2007 (2 years 11 months)

Design and develop custom functionality for a digital asset management system. Train junior developers on development process, monitor and report progress. Improve application build process and improve automated testing practices by incorporating static analysis tools and continuous builds.

#### Integrated Corporate Solutions

##### Senior Software Engineer

March 2003 - June 2004 (1 year 4 months)

VML

Consultant

July 2002 - March 2003 (9 months)

Colgate, AMC, Burger King and Sprint projects. Java, JSP, IntelliJ, ANT.

TriCom Technical Services

Systems Engineer

August 2000 - June 2002 (1 year 11 months)

Java/J2EE Consultant

- \* Completed documenting and coding JSP based application for a fast approaching deadline. Used JSP TagLibs for use in web based admin functionality. Designed and implemented security model. Introduced version control to project. Created a simplified build, test, and release plan.

- \* Team redesigned the request for proposal (RFP) platform by architecting a J2EE framework for the system. Decreased the overall load to the system and increased performance dramatically.

- \* Modified framework for ap server clustering. Incorporated switchable database environments. Developed branding functionality using XML and CSS.

- \* Developed Java client (AWT Applet) for jabber protocol. Setup Jabber server, database, and all transports. Actively developed for Jabber Open Source project critical functionality for database connectivity.

Valentine Radford

Developer

January 2000 - June 2000 (6 months)

Used Java, JSP and Javascript to develop crucial functionality for web applications. Developer on an in-house Java based ecommerce engine that incorporates shipping, inventory management, shopper, catalog, order process, marketing and administration. Developed shipping component using USPS APIs and XML. Interface and information design. Used HTML, DHTML and Javascript to develop websites. Created Java application for data mining from web logs. Used custom reports to clarify reports generated by WebTrends. Painting applet application. Captured paintings from users and converted to JPEG for publishing using servlets and Java2D API.

- \* Developed Multimedia video and audio for internet and CD production.

Cephas Technologies Inc.

Software Engineer

May 1999 - December 1999 (8 months)

Design and code advanced e-commerce and web applications. Integrated with Cybercash, IBM Net.Commerce. Helped troubleshoot and resolve production issues. Resolved many Y2K issues. Work closely with a team of designers, account managers, and a programming team leader to develop and implement challenging, high-end E-Commerce/ Business solutions for a diverse group of clients
